Tobacco Stocks Report

as of October 1, 1945

JAN 23 1946

U. S. DEPARTMENT OF AGRICULTURE
PRODUCTION AND MARKETING ADMINISTRATION

Washington, D. C.
November 23, 1945

CONTENTS

	Page
Discussion	1- 4
Stocks of leaf tobacco, by types and groups of grades	5-12
Stocks of Burley tobacco, by groups and qualities	13
Production, stocks, supply, disappearance, and price, of specified types	14-17
Stocks of leaf tobacco, by types, showing separately quantities owned by dealers and manufacturers	18
Conversion factors for adjusting for losses in weight	19
Stocks of leaf tobacco, by types, converted to a farm-sales-weight equivalent	20
Stocks of leaf tobacco, summary by types	21

EXPLANATION OF GROUP SYMBOLS

GROUPS OF TYPES 11, 12, 13, and 14:
- A-Wrappers
- B-Leaf and smoking leaf
- C-Cutters
- X-Lugs and primings
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 21, 22, 23, and 24:
- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 31:
- A-Wrappers
- B-Bright leaf, red leaf, and tips
- C-Lugs and cutters
- X-Trash and flyings
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 32:
- B-Heavy leaf or dull crop
- C-Thin leaf or bright crop
- X-Seconds and ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 35, 36, and 37:
- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 41:
- B-Binders or tops
- C-Fillers (farm wrappers)
- X-Stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 42, 43, and 44:
- C-Fillers (farm wrappers)
- X-Stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 46:
- C-Superior
- X-Inferior
- Y-Defectuoso
- S-Scrap (Picadura)
- N-Nondescript

GROUPS OF TYPES 51, 52, and 53:
- A-Wrappers
- B-Binders, seconds, and brokes
- C-Fillers and short darks
- X-Stemming grades
- Y-Sand-leaf fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 54 and 55:
- B-Binders
- C-Fillers
- X-Stemming grades
- Y-Sand-leaf fillers or bottom leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 56:
- B-Binders
- C-Fillers
- X-Stemming grades
- Y-Ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 61 and 62:
- A-Wrappers
- B-Stout wrappers and binders
- C-Fillers or tips
- X-Filler brokes
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 81, 82, and 83:
- A-Wrappers
- C-Fillers
- S-Scrap

STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS

Total Stocks Larger Than On October 1 Last Year

Stocks of all types 1/ of leaf tobacco owned by dealers and manufacturers in the United States and Puerto Rico on October 1, 1945, 2/ totaled 2,512,982,000 pounds. This is around 151 million pounds above the 2,361,553,000 pounds reported last year and represents the highest October 1 holdings since 1942. Total holdings of all types increased over July 1, 1945, by 139 million pounds. During the quarter, July to October 1945, an estimated 700 million pounds entered stocks through sales or deliveries. These additions consisted mostly of flue-cured, but included some Maryland and cigar-leaf. In comparison, around 520 million pounds entered stocks through sales during the third quarter last year.

With the exception of fire-cured and cigar-binder stocks, holdings of all classes of domestic tobacco were larger than a year ago. Both fire-cured and cigar-binder holdings were at the lowest levels in the 17-year series in which stocks have been reported. Total domestic cigarette leaf stocks were 9.3 percent above October 1, 1944, which is the first time since 1941 that these stocks have not shown a decrease from the previous year. Combined cigar leaf stocks were higher than in October 1944 despite the decrease in binder holdings.

Commodity Credit Corporation stocks as reported on October 1 were 138 million pounds, the bulk of which or 137 million pounds was flue-cured. The larger portion of these stocks are earmarked for export and are not actually available to domestic manufacturers.

Stocks reported as owned by dealers on October 1, 1945, were 288,896,000 pounds or 11.5 percent of the total October 1 holdings, while manufacturers' stocks amounted to 2,224,086,000 pounds or 88.5 percent of the total reported. (See footnote 2, page 13.)

1/ Figures quoted for type totals in this summary are the sums of unstemmed and stemmed leaf, as reported. Tables in the body of the report show stocks in detail, subdivided according to recognized groupings; stocks on a farm-sales-weight basis; and stocks owned by dealers and manufacturers, separately.

2/ The general instructions for filing the tobacco stocks reports, required of dealers and manufacturers by the United States Department of Agriculture, specify that the report shall be made as of the opening of business on the first day of each quarter.

CIGARETTE-LEAF STOCKS

All Domestic Cigarette Types Above Year Ago Level; Foreign Grown Cigarette and Smoking Tobacco (Turkish and Other) Higher Also

Flue-cured stocks increased 6.5 percent over October 1 last year. However, a considerably larger volume of the new crop entered stocks before October 1 this year than in 1944. Stocks of flue-cured tobacco this October 1 totaled 1,255,608,000 pounds, an increase of 77 million pounds over the same date last year, but still considerably below the peak October 1 figure of 1,513 million pounds established in 1941. Holdings were 311 million pounds above those reported on July 1 because of the additions of the 1945 crop to stocks. Sales of flue-cured tobacco during the July-September period amounted to around 675 million pounds as compared with 503 million during the same period a year ago.

Burley stocks were considerably larger than a year ago. Holdings of this type on October 1 were 642,841,000 pounds, an increase of 14.9 percent or 83 million pounds over the amount held on this date last year. Stocks of Maryland tobacco were 46,837,000 pounds as compared with 41,284,000 held on October 1, 1944. During the third quarter, Maryland stocks increased 7.3 million pounds. About 18 million pounds of Maryland leaf of the 1944 crop entered stocks between July 1 and October 1 this year.

Holdings of foreign-grown cigarette and smoking tobacco (Turkish and other) were 74,624,000 pounds as compared with 65,278,000 on October 1 last year. October 1 stocks were 3.7 million pounds below those reported on July 1.

SNUFF AND CHEWING-LEAF STOCKS (DARK TOBACCO)

Fire-cured Stocks at Low Point
Dark Air-cured Shows Slight Increase Above Last October 1

Fire-cured stocks were at the lowest level for October 1 in the 17 years of the series. The total inventory of fire-cured was reported as 123,622,000 pounds as compared with 163,066,000 pounds a year ago. During the quarter, July-September 1945, stocks decreased 33 million pounds against the average decrease of 15.6 million during this quarter for the three year period 1942-44. The unusually large disappearance during the third quarter this year can be attributed chiefly to a much expanded volume of exports. Although final figures are not available, exports probably will amount to over 20 million pounds as compared with only 2.2 million during the third quarter in 1944. Of the total fire-cured stocks reported on October 1 this year 20,257,000 were of Type 21; 71,823,000 pounds of Type 22; 31,449,000 pounds of Type 23, and 93,000 pounds of Type 24.

Dark air-cured stocks on hand totaled 53,427,000 pounds compared with 50,833,000 pounds on October 1, 1944. Dark air-cured stocks were divided as follows: 27,679,000 pounds of One Sucker; 22,861,000 pounds of Green River; and 2,887,000 pounds of Virginia sun-cured.

CIGAR-LEAF STOCKS

Cigar Fillers and Wrappers-Up Binders at Low Level

Domestic cigar-filler stocks totaled 181,418,000 pounds on October 1, 1945 compared with 166,697,000 on October 1 a year earlier - the major portion of this increase being in Puerto Rican. Of the total filler stocks, Pennsylvania seedleaf was 96,005,000 pounds; Gebhardt 14,940,000 pounds; Zimmer 9,343,000 pounds; Dutch 4,387,000 pounds; and Puerto Rican 21,776,000 pounds in the United States and 34,967,000 pounds on the Island. Total Puerto Rican stocks were 17 million pounds above holding a year ago as a result of the large 1944 crop.

Binder stocks reported on October 1, 1945 were 94,486,000 pounds, a decrease of 5.4 million pounds from last year and the lowest point for binder holdings on October 1 for the past 17 years. In the binder types, Connecticut Broadleaf stocks were 21,801,000 pounds. Connecticut Havana Seed 17,448,000 pounds, New York and Pennsylvania Havana Seed 2,850,000 pounds, Southern Wisconsin 25,575,000 pounds, Northern Wisconsin 26,490,000 pounds, and Georgia and Florida sun-grown 322,000 pounds.

Cigar wrapper stocks showed an increase over last quarter and also over stocks reported a year earlier. Total cigar wrapper stocks were reported as 15,351,000 pounds, the highest level for October 1 stocks since 1933. Connecticut shade holdings were 9,201,000 pounds and Georgia and Florida shade 6,150,000 pounds. The bulk of Type 62 usually enters stocks during the third quarter and holdings for this type were up 2.2 million pounds over July 1. The major portion of Connecticut shade enters stocks during the fourth quarter.

Stocks of foreign-grown cigar leaf totaled 23,368,000 pounds on October 1 this year compared with 21,191,000 pounds a year earlier. This increase was the result of larger stocks of Cuban tobacco in this country. Cuba (Havana), Type 81 totaled 20,585,000 pounds, Sumatra and Java, Type 82, was 2,421,000 pounds, Philippine Islands (Manila) was only 32,000; and other foreign grown cigar leaf 330,000 pounds.

Total stocks of Miscellaneous Domestic types on October 1, 1945, were 1,400,000 pounds. Type 71, Eastern Ohio, amounted to 92,000 pounds; Type 72, Perique 373,000 pounds, and Type 73, other miscellaneous domestic 935,000 pounds.

DISAPPEARANCE

Disappearance for most types, in which October 1 stocks are used to determine the amount, was greater than during the previous year except in the cigar binder class. In the fire-cured types, disappearance was at the highest levels in recent years. This was caused mainly by the exporting of stocks which were held in this country because of the War. Burley disappearance was the greatest in its history. All of the binder types were below the previous year except Southern Wisconsin while in the filler types Pennsylvania Seedleaf was up 8.1 million pounds. However, disappearance of the Miami Valley Types (Ohio) was slightly smaller. (See Table 3).

NOTE

The table on disappearance by types is shown in the quarterly Tobacco Stocks Reports at the end of respective marketing years as follows:

January 1

Maryland, Type 32
Puerto Rican, Type 46

July 1

Flue-cured, Types 11-14
Georgia and Florida sun-grown, Type 56
Georgia and Florida shade, Type 62

April 1

None

October 1

Fire-cured, Types 21-24
Dark air-cured, Types 35-37
Burley, Type 31
Cigar-filler, Types 41-44
Cigar-binder, Types 51-55
Connecticut shade, Type 61

Table 1.-Stocks of leaf tobacco, by types and groups of grades, owned by dealers and manufacturers, October 1, 1945, compared with July 1, 1945

1/ Subject to revision.

2/ See supplementary Burley report on page 13.

3/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

4/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone.

* Revisions in July 1 report.

Table 3 .-Production, stocks, supply, disappearance, and price of specified types, 1940-45 1/ - Cont'd.

CONNECTICUT SHADE-GROWN, TYPE 61

Year	Production	Stocks Oct. 1 farm-sales weight	Total Supply	Disappearance year beginning Oct. 1	Average price per pound
	Million pounds	Million pounds	Million pounds	Million pounds	Cents
1940	5.5	9.8	15.3	7.4	83.0
1941	6.4	7.9	14.3	6.3	113.0
1942	5.6	8.0	13.6	6.0	150.0
1943	6.3	7.6	13.9	5.2	185.0
1944	7.7	8.7	16.4	2/ 5.9	170.0
1945	3/ 7.6	2/ 10.5	4/ 18.1		

1/ Annual disappearance for a given type is calculated for the marketing year established for that type, the year beginning at the quarterly reporting date on which stocks of the type are at their lowest point, and before the new crop enters stocks. Marketing years vary for different types, and for the types covered in this table, a October-September year is in effect, and October 1 stocks are used in determining disappearance. For stocks applicable to other types, see page 4. Disappearance is calculated as follows: Production for any given year, for example, 1944, plus stocks on October 1, 1944, equals total available supply for the year beginning October 1, 1944. This supply figure minus stocks on hand on October 1 the following year (October 1, 1945) equals the disappearance for the year, or from October 1, 1944, to September 30, 1945.

2/ Subject to revision.

3/ November 1 estimate.

4/ Preliminary.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis. Figures are as reported to date; no revisions of this table will be made.

2/ The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown in the manufacturers' column also include stocks purchased under agreement with the Commodity Credit Corporation which are earmarked for export and are not actually available to manufacturers; these stocks are reported as approximately 138 million pounds, 137 million of which consist of flue-cured. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

3/ Includes stocks on the Island of Puerto Rico.

4/ For explanation of stocks included in this classification see footnote 3 on page 12.

5/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone.

Table 5. - Conversion factors for adjusting for losses in weight incident to stemming, handling, sweating, and drying, all types of tobacco.

Type	U.S. type number	Factors to multiply by to convert weights	
		Stemmed stocks to unstemmed equivalent	Unstemmed stocks to farm-sales weight
Flue-cured	11-14	1.282	1.12

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners except (a) the original growers of tobacco; (b) manufacturers who in the first three quarters of 1944, according to the returns of the Commissioner of Internal Revenue, manufactured less than 35,000 pounds of tobacco, less than 185,000 cigars, or less than 750,000 cigarettes, pursuant to the provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress.

2/ Subject to revision

3/ For explanation of stocks included in this classification see footnote 3 on page 12.

4/ Does not include stocks owned by Netherlands Indies Produce Corporation held in the free trade zone.

* Revisions in July 1 report.
